KEY FEATURES

- ✓ Prevent whipping in the event of a pressurised hose becoming detached from its fitting
- ✓ Made from the highest grade galvanised steel and 316 stainless steel wire
- ✓ Colour coded for easy range identification

Slingco offer a range of safety restraining socks and whipchecks designed to prevent whipping in the event of a pressurised hose becoming detached from its fitting.

Made from the highest grade galvanised steel and 316 stainless steel wire, and colour coded for range identification, our socks are designed for various plant-critical applications across a wide range of commercial industries. Suitable for restraining all types of high pressure hoses such as water and air hoses, hydraulic hoses, concrete pump and delivery hoses as well as supporting electrical cabling within critical applications within mining, automation and other industrial sectors.

The socks are woven in such a way that the lattice or weave is uniform throughout its length, ensuring even load protection around the hose. This helps with any adverse abrasion to the hose and prevents displacement in the event of rupture. Available for 5mm to 200mm diameter hoses.

STANDARD DUTY HOSE RESTRAINT SOCKS - DOUBLE EYE

This information is for marketing purposes only. The details contained herein is presented as general information and no representation or warranty is expressly or impliedly given as to its accuracy, completeness or correctness. It does not constitute part of a legal offer or contract. For technical specifications, please contact Slingco Australia Pty. Ltd

Dimensions

The figures shown are indicative only. Fully dimensioned data-sheets are available on request. Nominal figures/actuals are as per data-sheet with tolerances of +/-10%. Please contact us if you have any questions.

Range dimension overlaps If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
