

POLE LINE SUSPENSION CLAMPS

KEY FEATURES

- ✓ Safe and quick installation and removal of the conductor.
- ✓ Variety of sizes to accommodate conductors from 0.16 to 1.50 inch diameter
- ✓ All moving parts of the clamps are captive.
- ✓ Made from heat treated aluminium alloy 356-T6 or ductile iron 60-45-15
- ✓ Hot dip galvanised for corrosion resistance

Slingco suspension conductor clamps provide safe and quick installation and removal of the conductor when attached to the insulator. A single fastener fully opens and closes the jaw. The clamps come in a variety of sizes to accommodate conductors from 0.16 to 1.50 inch diameter, and loadings of up to 18,000 lbs. To prevent loss, all moving parts of the clamps are captive.

Depending on size, the clamps are either made from heat treated aluminum alloy 356-T6 or ductile iron 60-45-15 and hot-dip galvanised for corrosion resistance.

Dimensions

The figures shown are indicative only. Fully dimensioned data-sheets are available on request. Nominal figures/actuals are as per data-sheet with tolerances of +/- 10%. Please contact us if you have any questions.

Range dimension overlaps If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
