

HEAVY DUTY SUPPORT GRIPS – DOUBLE EYE LACE-UP

KEY FEATURES

- ✓ Made from stainless steel wire
- ✓ Designed for heavier cables
- ✓ Can support multiple cables in a bundle
- ✓ Used when the ends of the cable(s) are not accessible

Heavy Duty support grips made from stainless steel are perfect for supporting heavier cable, conduit or any other cylindrical object. Often used by Utilities and Contractors to support cables transitioning from overhead to underground. One may support multiple cables in one grip. The overall diameter of the cable bundle should fit within the listed range.

Dimensions

The figures shown are indicative only. Fully dimensioned data-sheets are available on request. Nominal figures/actuals are as per data-sheet with tolerances of +/-10%. Please contact us if you have any questions.

Range dimension overlaps If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
